## cooling outside

radiations rhythm

dissolved the limits of the day

fell

in the air poles

constantly moving

roots flying splashing

this day

before in the inexplicable abyss eyes crying

on the pages

squealing on the surface

dreaming of ice

plunging

#### u-modulus

drops falling insects in the transparent jellies
full of stumps and roots

smooth

cold

nights

dark dark dark

an ostensibly dark star

amid the blaze of midnight

when it deserts

vacant

in its interstellar cave

chemical sea-sensitive

ghost sounds

second roles of the spectra

scattered by the circulation of animal spirits

infect the organs

the imagination

the envelope of poisonous illusions

vibrations

vibrations

acidic white

seas surfaces put at seas

submersion of the submersion

on the head

of the dumbfounded text collapsing

diluted

suddenly ice

everything frozen

desired dislocations black water

igniting wind zero

messages

until the empty gaze

indistinct exotic

spectraly snow-covered

barely audible

zero wind transmiting

white silk masked phasmidas

like snow

### of zero

elliptical disorientation of the accidental

isolated

letter

hell adherent huge in the night

ants in a black hole

insects on the surfaces

blackening the contact shadows

translucided bluish liquids

pure absolute surfaces thrown into the abyss

dislocated

dazzle

white fugitive

blurring shoot down glittering

turbulences

thousands of liquid trajectories from its own head

diaphanous

black

chrome

sonic

floating swelling

# shifted holographic hyperfluids

impulsive

hemispherical harmonics

as the vibrational of the night

gliding

green flames blinking

wind uprooting

the elliptic trees

meridian dreams

stellar phantoms

lizards colors waved

muffled

exploded invisible memory
agitated by strange vibrating spasms
in the thermal silence
sleepwalking illusions flying
transparent disks towards the dunes
burning the cold breezes
where hyperfluids blow

#### ice amnesia

plunged into the rifts

ice

amnesia

chemically arisen

entangled

spirals

excluded

disturbing the atypical

triangle

projected ahead

grinding rhythms

condensating the unreal

reverse illusions

unelected differences

dislocated destinations

masks of light
wrapped in the void
by the horizons
the abstract game
astounding density
of the transient mental phenomena
weather monsters

00:00:00

dark absences
strange scenarios
holographic wood
the pace of the thrill
liquid trajectories
ending up rhythmically breaking
in this metaphysical exosphere
dispersing all projections

thousand times closer

voxels at the edge

floating freely

energy nets oscillating

magnetic disturbances shivers

artificial visions climatic

islands swimning

### polycyclic

surrounded towards the root medium

by hypervisible-invisible

deregulated gradients

hours of hypnotic wakefulness phonotopes drifting

swimming freely

conversely

imaginary immune systems disintegrating spontaneous spaces

magical spaces side-by-side

transparent climates flow

out of the lightcones

in a continuous tense blindness unphased snow

withdrawn sonic abondonments

unstable tracery flit

drawings flutter around

auditory hallucinations

the immense

coexisting

multiplied

unrestrained

intense

code amnesia of the lucid lines of an inverted film

transparent species migrating

phantasmatic watersheds thrown

drawn with the polyphonic

polycyclic volatile volutes

enveloping whistling lianas

magnetic sheets

beyond the infused delusions

green flames crossing dunes in cataclysms

swimming the indefinite turbulent

boundless fluctuant

# magnetic breakings

noises of music deeper than the whistles of the seas

submerging jellies

transparent

overlying mirrors

looping in the shade

projecting halos split divided

crazy drawings

everything disapeared appears

magnetic breakings

scattered bloom in the heterogeneous gases

interstellar fictions

strange over the jungle

heterochronic shocks

invested in the invisible pulverized strips foldings fluctuating masks of the infinite slowing down time

## looping

rapids exploded night memory in the bright vertical air magic lenses blooming stellar rays in the whispering eyes what's outside the instant sky escaping flashed away beyond strange mnemic rhythms playground of the phantoms stepping outside of these spaces a hidden million eyed monster

#### ionized

permanent upwelling

the giant outside

time escapes

leaves

and the humidity of the air

lit heliums

strange distractors drifting

destructible inflammable divinations

burning in the eyes

sands sizzle lightning zombie beacons

ravines sing

winds sharpen hosts of crisscrossing rhythms

playing out

dancing

the aether talk transduced

# sliding clicks into sequences of holes and no-holes sped up atuned

## e-folding

like frontiers

green

green grasses like great flashes of sea

breezes of an alien among

invaded

madrepores milk

lightning flashes on the gliding

running spirits

of the phosphorus limits

enmeshing hours in deep dark yellow meshes

bleeding like blind flutes

words of space

white eyes

lashed among the burning leaves

spleepless maladies fleeing

haunted by the gloomy depths its palms beating bare feet among the flooded forests raining sparkling abyss swaying seeds of lightning on every crest blinded on the black water the radiance of the dawn sliding incorporeal resounding blind accidents green insects over my eyelids ending in parrot calls

# revolving harmonics

shining heavy limbs

climbing

rhythms

flowing down

silently fowing

streaming blue of your limbs

feeding the invisible

beasts scratching

naked water like the pulp of dreams

# viscous dawn collimating

palms...!

deluge on the pale eyelids dreaming of the black fruit

swimming shades

viscous dawn fragrances

circles in the air green delights

the evening swallowing plasmas

palms!

propagating mangroves your voice singing

refreshed lusts

embalmed

bathing in sea smokes invisible salt morning

of silk webs

the shore breathing unfolding

palms!

sulphur colour

incandescent sandsmokes

leaving leaves

writing unintelligibly lapsing

crystal nautiles

feathers lenses of the disembodied longitudes

green lights lightnings lay bare

gates of the future reverse sides

of the translucent corals

in the mirrors depths

lust-leap lightning reaching

dark smokes behind violent rains

palms!

wash wash wash

surges

snows

dawn-palm groove under glass flying
fumes of fugitives towards the starlight
blind forests corals
sky keeping the distance
as a fresh membrane
sea to sea
palms!

#### cataclysmic

empty streams in the hermetic forest
warm air thick heavy sluggish silence
on the silvery banks into the still shade
closed upon it
as the sea closes over a diver
of wooded islands trying
to find the channel splashing

#### quasi-feelings

unleashed aerial mosses
looser meshes on the surface of free abysses
oscillating

reptiles snakes medusas
errant winds errant musics

livid glutted flashes

flame-yellow flecked

with black mornings beating

uprooting dark ferns

rain ghosts

rain ghosts amidst magnetic rains

hanging harsh

nocturnal rifts ridges shadows modulations

amid the blindness of things

hauling the masks of lost memories

shaking the future

as in the sleepers visions

without eyelids

enraptured substances where ciphers move

like discharges

magnetic eyes hauting

reverberating all our phantoms

madreporic washing

their faces streaming

for the bulbs bearing seeds in the lit rain

as far as the distant seas

the immense

green-like

magnetic leaf sampling

unrolling

bearing the silken sound of widen seas

in its sea-flowing

itself all-foam distance

flashes

as the medusa spasms snow sown

with hailed storms

on the dark marbles of the deep sea stretching

great forks of coral mingling

sleepless dark fires

and the rain

## flaming

sand and snow

fleeing with the flight

bathing in green eyes green

spirits green salts

listening to the migrating late blooming

whisteling sea

flaming beats

barred

the mirror offering to the outer

bitter dream weeds

towards in a flash

slate coloured

magnetic

divergent seas wandering in the distance

listening

sea-larvae running shades
flood-tide
wizard snakes unwind

# vegetation reflectance

night rolling drums behind the trees stillness brooding over of an implacable force as if hovering wanderers in the air high over wooded banks slipping in the past an unknown planet cutting off our surroundings gliding in the past short noises left behind interminable miles of silence in our creepy thoughts like a phantom the star rose

like something solid

a white fog

lifted as a shutter lifts

the infinite desolation

soared slowly

in the opaque turbulent

# holophonic foam

over the deep ripples of the abysmal inexplicable notes of the desperate

swept by us

behind

the blind whiteness of the different dawns

the fog photosynthetizes

fires

made by the zombie

the air

by such clear nights

even soporific

swims the canopies

# splitting

streaming sands
no shores
slowly veiled
sand lights between
the alien sea haunting
the dazzling lightning
lightning inbetween our hosts
